

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, JULY 30, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Five new large fires were reported, four in Northern Rockies and one in Rocky Mountain Areas. Three large fires reached containment, one each in Northern Rockies, Northwest and Eastern Great Basin Areas. Initial attack activity was light nationwide. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

EASTERN GREAT BASIN AREA LARGE FIRES:

GREEN KNOLL, Bridger-Teton National Forest. A Type 1 Incident Management Team (Carvalho) is assigned. This fire is located along Mosquito Creek, southwest of Wilson and approximately six miles southwest of Jackson, WY. A Unified Command with Teton County Fire Department is in effect. Mandatory evacuations are still in effect for five subdivisions, including Indian Paintbrush, Crescent H Ranch and residences along Fall Creek Road. Fall Creek Road continues to be closed to public access. Good progress in containment efforts were made in all divisions.

SNOWSHOE, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is 25 miles northwest of Stanley, ID. A revised wildfire situation analysis was approved, with the preferred alternative being an indirect strategy keeping the fire within the Pistol Creek drainage. The fire continued to advance down the south side of the Pistol Creek drainage below the confluence with Luger Creek.

FLEMING CREEK, Lower Snake River District, BLM. A Type 2 Incident Management Team (Suwyn) is assigned. This human caused fire is eight miles north of Horseshoe Bend, ID. Rugged terrain continues to hamper containment efforts, with some areas being inaccessible via ground resources. Highway 55 still faces temporary closures due to fire equipment and rolling debris.

NORTHERN CALIFORNIA AREA LARGE FIRES:

STREAM, Plumas National Forest. A National Type 1 Incident Management Team (Raley) is assigned. This fire is 25 miles northeast of Quincy, CA. Mopup

and fireline improvement continues. POWERHOUSE, Shasta-Trinity Ranger Unit, California Department of Forestry. A California Department of Forestry Type 1 Incident Management Team (Walters) is assigned. This fire is burning near the community of Big Bend, CA and is threatening numerous structures.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	\$\$\$ C-T-D
STREAM	CA	PNF	3560	60	8/1	1164	37	17	7	0	1.8M
POWERHOUSE	CA	SHU	416	95	7/30	1385	43	81	6	0	528K

SOUTHERN CALIFORNIA AREA LARGE FIRES:

BRICEBURG, Sierra National Forest. A Unified Command with California Department of Forestry Type 2 Incident Management Team (Hodson) and a California Interagency Type 2 Incident Management Team (Rios) has been established. This fire is 15 miles east of Mariposa, CA. Fire activity remains low due to increased night time relative humidity. Mopup operations continue along Sweetwater Ridge.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	\$\$\$ C-T-D
BRICEBURG	CA	SNF	728	70	8/1	552	13	8	0	0	2.5M

NORTHWEST AREA LARGE FIRES:

UNION VALLEY, Southeast Washington State. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned and will assume Unified Command with Chelan Fire Department #7, the City of Chelan and the Chelan County Sheriff. This fire is four miles north of Chelan, WA. The fire continues to burn actively in grass, sage and stringers of ponderosa pine and has moved north out of the Union Valley into Washington Creek.

PORT KELLY, Washington State. A Washington Interagency Incident Management Team (Jennings/Graue) is assigned. This fire is 15 miles southeast of Kennewick, WA and near the community of Wallula, WA. Demobilization of resources is starting to occur.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC LOSS	\$\$\$ C-T-D
UNION VALLEY	WA	SES	2500	10	UNK	489	17	24	6	3	NR

PORT	OR	ORS	5000	100	-	0	0	0	0	0	NR

ORS = Oregon State, Umatilla County

WESTERN GREAT BASIN AREA LARGE FIRES:

TABOR CREEK, Elko Field Office, BLM. A Type 2 Incident Management Team (Murphy) is assigned. This fire, burning in grass and sagebrush, is 13 miles north of Metropolis, NV. The fire continues to torch along the perimeter and interior islands of unburned fuels. Heavy use of retardant aircraft helped to hold the fire during high wind events yesterday.

SMITH CREEK, Humboldt-Toiyabe National Forest. This lightning caused fire is 40 miles west to southwest of Ely, NV. The fire made no significant runs, but 40 percent of the perimeter was active. Additional crews and air support were requested to help with containment efforts.

SMITH CREEK	NV	HTF	2100	30	7/31	180	6	9	2	0	NR

NORTHERN ROCKIES AREA LARGE FIRES:

AUTHOR, Yellowstone National Park. This fire is near the southeast entrance of Yellowstone National Park. Visitor and internal park structures are threatened. High winds forced all aircraft to be grounded, hampering containment efforts.

CASTLE, Lewistown Field Office, BLM. This fire, burning in ponderosa pine, grass and sagebrush is 40 miles southwest of Glasgow, MT. Twenty foot flame lengths were observed. Winds are impeding containment efforts.

KILL WOMAN, Lewistown Field Office, BLM. This fire, burning in ponderosa pine and grass, is 40 miles southwest of Glasgow, MT. Strong winds are hampering containment efforts.

LIGHTNING	MT	FBA	350	100	-	12	0	0	0	0	NR

FBA = Ft. Belknap Agency

ROCKY MOUNTAIN AREA LARGE FIRES:

MAD CREEK, Routt National Forest. This fire is in the Mount Zirkel

Wilderness Area, 11 miles north of Steamboat Springs, CO. Blow down in the area helped to create an intense surface fire with some short range spotting.

WEST PLATEAU, San Juan National Forest. This lightning caused Wildland Fire Use fire is 20 miles northeast of Dolores, CO. The fire made significant runs due to hot, dry and windy conditions.

ECKLUND COMPLEX, Little Snake Field Office, BLM. A Fire Use Management Team (Cook) is assigned. This complex of lightning caused Wildland Fire Use fires is in the Diamond Breaks Wilderness Study Area, 50 miles east of Vernal, UT. The Ecklund fire continues to exhibit a creeping surface fire, which is active over a four acre area. A few smoldering areas were observed on the Davis Draw fire.

OUTLOOK:

*** A RED FLAG WARNING HAS BEEN POSTED IN WESTERN UTAH FOR WINDS, DRY UNSTABLE AIRMASS AND DRY FUELS ***

*** A RED FLAG WARNING HAS BEEN POSTED IN CENTRAL AND SOUTHWEST WYOMING FOR WINDS, DRY UNSTABLE AIRMASS, DRY FUELS AND WARM TEMPERATURES ***

High pressure will move eastward allowing a Pacific cool front to move through Utah. This will bring partly sunny and windy conditions to Utah, with a chance of isolated dry thunderstorms. Southern Idaho will have an increasing chance of showers and afternoon thunderstorms. High temperatures in Utah will be 75 to 85 in the mountains and 90's at lower elevations. Idaho will have high temperatures in the 60's in the mountains and 65 to 75 at lower elevations. Minimum relative humidity will range from 5 to 15 percent at the lower elevations of Utah and 10 to 20 percent in the mountains. Minimum relative humidity in Idaho will range from 30 to 40 percent to the west and 10 to 25 percent east. Winds will be west to southwest at 15 to 25 mph in Idaho and southwest at 20 to 30 mph with gusts up to 45 mph in Utah.

High pressure moving eastward will allow an increase in tropical moisture. This will bring mostly sunny and windy conditions to Wyoming, with scattered afternoon thunderstorms to the northwest and isolated thunderstorms east. Colorado will have partly sunny skies with isolated to widely scattered dry afternoon thunderstorms. High temperatures will be in the 70's to mid 80's in the mountains, and 90's at lower elevations. Minimum relative humidity will range from 10 to 20 percent, except for 15 to 25 percent in the mountains. Winds will be west to southwest at 10 to 25 mph, with gusts up to 40 mph in eastern Wyoming.

A low pressure will move through northern California bringing mostly cloudy to partly cloudy skies with a few light showers in the very north and isolated light showers and thunderstorms in the Cascades and Sierra Crest eastward. High temperatures will be in the 60's along the coast and mid 70's to lower 90's inland. Minimum relative humidity will range from 55 percent along the coast, to 25 percent inland. Winds will be west to northwest at 5 to 15 mph and 15 to 25 mph over higher terrain along the Cascades and Sierra Crest eastward.

High pressure that has been over southern California will move eastward as a low pressure system moves into the northern part of the state. This will bring fog and low clouds spreading inland, otherwise conditions will be sunny and warm. High temperatures will be near 70 along the coast, 80's to mid 90's inland and 98 to 108 in lower elevation deserts. Minimum relative humidity will range from 12 to 25 percent. Winds will be south to southwest at 10 to 25 mph and locally gusty.

An upper level trough will move into the Pacific Northwest bringing cloudy skies and showers, with wet thundershowers possible in eastern Oregon and northeastern Washington. High temperatures will be in the mid 60's to mid 70's along western Oregon and Washington, ranging to the lower 80's in the interior portions of southwestern Oregon. East of the Cascades high temperatures will be in 60's in the mountains and 70 to near 80 at lower elevations. Minimum relative humidity will range at or above 40 percent west of the Cascades. East of the Cascades minimum relative humidity will range from 20 to 30 percent in the valleys and 25 to 40 at higher elevations. Winds will be northwest to north at 6 to 10 mph west of the Cascades, except for 15 to 20 mph along the southern Oregon coast. Winds will be northwest to west at 6 to 12 mph, except 10 to 15 mph in the Columbia River Gorge and southeastern Oregon with gusts to 25 mph in the afternoon.

A Pacific trough will move into Nevada bringing partly cloudy skies and a slight chance of showers north. High temperatures will be in the 80's in the north and central portions of the state and 95 to 105 south. Minimum relative humidity will range from 15 to 25 percent. Winds will be southwest to west at 15 to 25 mph and gusty.
